### **Endural's Budget Hybrid Case!**

Costa Mesa, California. March 2009. [Endural](#), an industry leader in vacuum-forming solutions has announced the release of their low cost "Hybrid Case." Made with a sturdy corrugated sleeve, supported by solid wood posts, and a leak-proof, vacuum-formed plastic base and top, these cases are designed for one-way shipping or extended storage.

"Our customers were looking for a more cost-effective option when the core and case were not expected to be returned - we think the Hybrid Case is it," said Sue Williams, Vice President Sales and Marketing. "It's durable enough to protect the contents for either one-way shipping or extended storage while fitting nicely into any budget," added Williams.

For more information about Endural and their new Hybrid Case, contact Sue Williams at 714-434-6533 ext. 201, or visit their Website at [www.Endural.com](http://www.Endural.com).

[Endural](#) is an expert in vacuum-forming solutions for the automotive, aerospace, medical, electronics, food service, and materials handling industries. Located at 1685 Scenic Avenue in Costa Mesa, the technical team is ready to assist customers in solving material handling and transportation issues with high performance containers, trays, and pans.
